4. ,, Nanjundaradhya, Pleader.
5. ,, V. Bandiah, Merchant.
6. ,, Sahib Jan Sahib, Landlord.

Notification D. No. 130, *dated* 23*rd May* 1923.

Under para 7 of the rules framed under Section XII of the Elementary Education Regulation V of 1913, the Head Master, Hindi Boys' School, Kankanhalli, is appointed as a member of the School Attendance Committee, Kankanhalli, in connection with the scheme of compulsory education in place of Mr. Madar Sab.

Notification D. No. 137 *of* 22-23, *dated* 28*th May* 1923.

With reference to Government Order No. 5350-3—Edn. 218-22-15, dated 8th March 1923, directing that for purposes of determining the future requirements of High Schools in the State, the maximum strength of High School class should be fixed at 40 for each section and the maximum number of sections of a class at 3, and on this basis the maximum total strength of a High School should approximately be 400 and of a Collegiate High School, 500 approximately, the enclosed statement showing the number of pupils actually under instruction during 1922-23, in the several classes of the Government and Aided High Schools for boys in the State and the maximum capacity of these classes in 1923-24, as per the above standard, is published for general information together with the following instructions. The main object in issuing this is to see that the accommodation, teaching staff, equipment etc., now available in our High Schools are put to the best use and that the pupils seeking admission are evenly distributed among the schools and no one is refused opportunity for further study.

The number of sections in the University Entrance Classes of Government Collegiate High Schools, Bangalore and Mysore will however not be reduced during 1923-24, since there is no provision according to the above standards for the teaching of Mathematics and Science in any of the Aided Institutions except the London Mission High School, Bangalore. Hence, there will be in the Government Collegiate High School, Bangalore, provision for 6 Mathematics sections with 300 pupils, 1 Natural Science section with 48 pupils and 1 History section with 40 pupils, and 3 Mathematics sections with 150 pupils, 1 Natural Science section with 30 pupils and 1 History section with 40 pupils in the Maharaja's Collegiate High School, Mysore. In the Tumkur Collegiate High School there will similarly be provision for 2 Mathematics sections with 100 pupils and 1 History section with 40 pupils. From the statement, it will be seen that there is considerable room for further admission in the Entrance classes (History Sections) of the Government Collegiate High School, Shimoga and Wesleyan Mission and Banumiah's Collegiate High Schools, Mysore.

Regarding the High School forms also some latitude has to be allowed both in the matter of the number of sections in each class and the strength of each section, as it will take some time to adjust the present staff and accommodation to the reorganisation indicated in the order quoted.

above. As a special case, therefore, the Government Collegiate High School, Bangalore, will be allowed to have 4 sections in the VI form and the strength of each section in all the High Schools will range from 40 to 50, additional sections being opened if the number goes beyond the latter figure till the maximum strength of 400 for an ordinary High School is reached. In the case of the Government High School, Hassan, however, having regard to the size of the rooms the strength of each section will be between 35 and 40.

With these reservations the rule will come into operation from this academic year and the Heads of Government and Aided High Schools will kindly adhere to the same and see that no High School form consists ordinarily of more than 3 sections in future and each section, of more than 40 pupils. The total strength of an ordinary High School will not exceed the limit of 400.

The opening of an additional High School at Malleswaram, Bangalore, with two sections in each form teaching History and Science as optionals, will, it is expected, absorb the majority of students that may be thrown out by the reduction in the number of sections of the V and VI forms of the Government Collegiate High School, Bangalore, to 3 and 4 respectively and the limiting of the maximum number of pupils in each form to the standard fixed. It is also expected that this new High School will draw off from the local aided high schools a number of boys coming from Malleswaram and the adjoining parts, so that this limitation of the number of sections and the capacity of each section in the existing high schools will not operate as a hardship to the student population generally or embarass the heads of institutions concerned.

The parents and guardians of students seeking admission will kindly note that all applications for admission should be accompanied by a leaving certificate without which the applications will not be considered at all. Leaving certificates applied for by students in June will accordingly be treated as immediate and granted the same day by the Head Masters to enable them to seek admission in one or the other of the institutions in time. The leaving certificates and other papers of candidates not selected for admission in any particular school will be returned to them immediately so that they may apply for admission elsewhere. As far as possible mofussil students qualifying for admission to the High School classes should join the high school in their respective districts.

To avoid all delays and difficulties arising in the admission of pupils out of the adjustments consequent on these changes, it is desirable that the Head Masters of all High Schools in Bangalore and Mysore Cities, where there is more than one High School, should soon after the receipt of applications for admission at the beginning of the academical year, meet together and after due consideration of the accommodation and other facilities then available in their schools, fix the number of pupils that each school will take in during that year and regulate admissions accordingly. The Head Masters of the Government Collegiate High Schools at these places will act as convenors of these meetings. It is expected that no student that seeks admission will, other things being equal, be denied admission to one or other of the High Schools and that all students will as far as possible be admitted to schools near their place of abode.

Statement showing the present strength and maximum capacity of pupils in the classes of Government and Aided High Schools in the State.

No.	Name of School	Entrance class		VI Form		V Form		IV Form		Total strength
